The Garrett Difference

Our Story

Charles and Eleanor Garrett founded Garrett Metal Detectors in Garland, Texas, from their home garage in 1964. Since that time, their leap of faith on a shoestring budget turned into a global business success. Today, the legacy of our founders lives on in the pride and attention to detail that Garrett employees put into every product we produce.

As a true American success story, Garrett is committed to quality made-in-the-USA manufacturing, demonstrated by our industry-leading 3-year warranty as well as the many Garrett products still reliably serving their owners after more than a decade of use.

The Garrett Security Division, founded in 1984 to provide metal detectors for the Los Angeles Olympic Games, now serves its global audience with the most reliable and flexible metal detectors on the market. The world-famous Super Scanner V is the most widely used and imitated security metal detector on the market. Garrett's latest walk-through metal detector, Paragon, is changing the game for checkpoint screening with exclusive new security features and cutting-edge integration and ease-of-use capabilities.

Our Values

The world of security is secretive by nature, but Garrett prides itself on providing an honest and realistic assessment of the needs and objectives of its customers. We don't make the biggest promises in the industry, but we do make the biggest promises our industry can keep. We innovate to solve real problems, not invented ones, and we deliver easy-to-use solutions because that is what our busy customers need in their daily life. When you want to know if your security screening will really address your need, you can count on us to deliver an honest report and a spin-free disclosure of our capabilities. Get the solutions you need for your facility and get Best-in-Class security when you work with Garrett.

Paragon™
Premium Walk-Through Metal Detector

PN 1172010
Paragon Complete Kit 30"

PN 1172011
Paragon Complete Kit 32.5" (ADA Compliant)

Kits include: transport casters, quick-swap 14 Ah lithium battery, transport brace, remote control, and Super Scanner V hand-held metal detector.

PN 1172002
Paragon Standard 30" International

PN 1172004
Paragon ADA-Compliant 32.5" International

66 ZONES
Paragon brings with it an industry-leading 66 zones – left/center/right identification of targets across 22 horizontal bands.

AMBISCAN
With Ambiscan, one detector does the work of two. This Paragon feature allows supervisors to set two distinct programs and sensitivities based on the direction of traffic.

BILATERAL DETECTION
Paragon has dual transmit and receive capability in both panels, a Garrett industry exclusive.

ZERO TOUCH
NFC card reader allows touchless settings adjustment.

IP 65
Exacting construction ensures all-weather performance and dust/water resistance.

QUICK-Q
Optional settings allow cell phones to be ignored while still catching mass casualty weapons.

THD™/ Super Scanner V™/ SuperWand™
Hand-held Metal Detectors

PN 1165900

- High-sensitivity detection in a portable package.
- Ideal for supervisors, patrol officers, and low-profile security.
- Detector of choice for security on-the-go.

PN 1165190

- World's most trusted hand-held metal detector.
- Ideal for most secondary screening applications, challenging environmental conditions.
- Extremely durable with reliable high-sensitivity detection.

PN 1165800

- Maximum ease-of-use secondary screening.
- Improved ergonomics to reduce staff fatigue.
- Ideal for high-speed screening environments and for use with minimally trained staff.

Use either as a primary scanning tool or in secondary screening to pinpoint targets detected by a walk-through metal detector. Garrett hand-held detectors will detect ferrous, non-ferrous and stainless steel weapons, contraband, and other metallic objects.

GARRETT® virtualacademy

Comprehensive Training Available

Garrett's Virtual Academy is a free online training platform with video content and graded knowledge checks so users and supervisors can learn with confidence. The videos are divided into short segments to ensure trainees are not bogged down in too many details and that each course can be completed at the user's convenience.
